NEW YEAR NEW YOU

Dear Friends of ZENXIN,

We have just bid goodbye to 2020! It has been a very challenging year and a memorable one for many of us. At ZENXIN, we count ourselves lucky that we have made it through with the hard work from our colleagues in the organic farm, packing houses, shops and supermarkets. They have fought hard to propel the company's operation forward despite of the tough pandemic situation.

Personally, it was tough for my parents who were unable to meet their grandchildren due to the strict travel restrictions over the past 9 months. We are not hopeful to have reunion meals together this Chinese New Year since the COVID situation in Malaysia is currently not under control.

Perhaps, many of us would have similar situations that may hinder us from reuniting with our loved ones across the borders physically. Thankfully, technology allows us to meet each other online. Though we may need to use online platforms to virtually "Lao Yusheng" this year. I believe that so long as our hearts are connected, any means of reunion can be as meaningful. This coincides with our ZENXIN New Year theme as "用心团圆" - reunion with our hearts.

With our operations in Malaysia, Singapore and Nanning, China, we aim to provide excellent service to deliver fresh organic vegetables and fruits especially Spanish Organic Clementines, Australian Organic Grapes, Belgian Organic Joly Red Apples, Organic Yusheng, Organic Fortune Bags, Organic Steamboat sets or your choice of products to your loved ones or friends easily. Do message us your requests through WhatsApp, Facebook messenger or simply call us. We put our best foot forward to deliver your thoughtful gifts right to the doorsteps of your loved ones.

Most importantly, I would like to thank you for your continued support through 2020. We seek your continual support in 2021! Stay tuned to find out how ZENXIN will celebrate this year for our 20th anniversary.

In this new year, ZENXIN hope that you get to refresh your mind by reading less toxic news, revitalize your body through eating good and nutritious organic food and renew yourself to adapt to the new normal in 2021 since COVID should be here to stay for the time being. I believe that so long we stay positive and consuming the right food, we can overcome the challenges ahead of us. Get ourselves ready as always, I am sure that we will reunite with our families very soon.

For the moment, let our hearts connect, as we stay together to overcome this pandemic!

Organically yours,

Sengyee, the ZENXIN Organic Team Leader

还来不及挥手告别，
2020年已经圆满结束。
但新冠疫情就像是个淘气的背包客，
出走到地球后，至今还未想过回到自己的“星球”。

2021年，农历辛丑年，
你家的团圆饭餐桌上也许会因为疫情而少了些亲人一块团圆。
正在阅读此文的你，也许会是其中一位远在他乡，无法回家过年的孩子。

无论你是无法回家团圆的游子，
抑或是等待家人归来的父母和长辈，
诚兴有机，与你同在，

我们深信，
有机蔬果是值得传承的好味道。
所以，
我们愿意为你传递你的祝福回家，
我们要你和家人，
就算隔着两岸三地，
也能幸福过年，一起用“心”团圆。

SAFE AND REFRESHING CHINESE NEW YEAR SPRING CLEANING FOR 2021

This year more than ever, the tradition of cleaning the whole house to chase out bad energy is really needed to usher in a brand new healthy way of living for 2021.

The Lunar New Year 2021 begins on Friday, 12th February. The 15-day festival starts on a new moon and ends with the Festival of Lanterns on the following full moon.

Traditionally, the month prior would see the useless items thrown out and the house cleaned from attic to basement. It is believed that by doing this, there is room for new and good energy to enter your life.

Here is a quick overview of common toxins often added to household cleaning agents.

There are fragrances added to air fresheners, soap and even toilet paper which can contain phthalates known to cause reproductive problems including endometriosis.

Dry-cleaning solutions contain perchloroethylene, a neurotoxin and possible carcinogen which causes dizziness and loss of coordination.

'Antibacterial' detergents contain triclosan, a hormone disruptor and probable carcinogen. It is known to be toxic to algae and promotes the growth of drug-resistant bacteria.

Fabric softeners, sheets and many 'antibacterial' household cleaners contain QUATS quaternary ammonium compounds, skin irritants. These products are a leading cause of asthma & dermatitis. They pose a similar problem to triclosan, breeding drug-resistant bacteria.

Window, kitchen and multipurpose cleaners can contain 2-butoxyethanol, a powerful solvent which can cause liver and kidney damage as well as narcosis & pulmonary oedema.

Polishing agents and glass cleaners also contain ammonia, a powerful irritant which causes breathing problems including chronic asthma and bronchitis.

Chlorine in scouring powders, toilet cleaners, mildew removers, laundry whiteners and household tap water is a known skin & lung irritant, and may disrupt thyroid function.

Lastly, oven and drain cleaners contain sodium hydroxide which is very corrosive and can cause burns to our delicate skin.

To ensure that Chinese New Year house cleaning comes with the appropriate health benefits as well as new energy, ZENXIN is offering the Almawin range of cleaning products from Germany.

Here are the descriptions of 5 basic Almawin cleaning products. From the range, you may find it useful to improve the overall health of your family for the coming year. All 5 have attained the Green Brand approval for being environmentally friendly, the ECO GARANTIE® as well as approval from the Vegan Society.

Almawin 'Babyflaschen Reiniger' is a cleaner for young mothers looking to avoid phthalates. Use for all baby's bottles, dummies, teething rings, dishes & toys. This is hypoallergenic with no perfume, colouring or pigments and is ideal for sensitive young skin. It is concentrated and powerful enough to remove milk, food and dirt residues.

Almawin 'Obst- und Gemüsereiniger' is a gentle cleaner for those who are worried about residues on their non-organic fruit & vegetables. Please use sparingly as the solution is concentrated. (2-12ml to 1 litre of water) Make sure to rinse your produce carefully with fresh clean water after using the solution.

Almawin Household Cleaner is an Eco-concentrated universal cleaner for all cleaning tasks around the home. It has a fresh lemon scent from essential oil of lemon and is an efficient and effective cleaner for all hard surfaces such as kitchen worktops, tiles, doors and floors. The combination of natural surfactants and plant-based degreasing compounds achieve excellent cleaning results while being gentle on the skin. (10ml to 5 litres of water)

Almawin Bathroom Cleaner has a special nozzle adaptor to produce a foam, almost completely eliminating the spray which irritates sensitive noses. The foam has a pleasant fresh smell from essential oil of peppermint and is effective in removing limescale and dirt. It is suitable for all acid resistant surfaces, but not for use on marble, limestone, or anodised surfaces. Ideally spray the foam about 40cm from the target surface and use sparingly.

Almawin Glass & Window Cleaner for those wishing to avoid toxic 2-butoxyethanol. This is another Eco-concentrated solution to be used sparingly. A special nozzle adaptor produces foam for easy cleaning on mirrors, windows, glass panels, tables, television, computer monitors. Take note that it is NOT suitable for plasma screens. Use it in your car's windscreen wiper system to make everything squeaky clean.

Let Zenxin help bring mindfulness in cleaning your home and together we can bring a healthy new start with attention and awareness to 2021!

The white shitake mushroom contains beta-glucan that is good for our heart health and it is known to regulate blood cholesterol.
